

BIBEK UPADHAYA

Full-Stack Developer | Node.js & React | BCA Student

bibeksharma747@gmail.com | +977-9865477840 | Kanchan-04, Rupandehi, Nepal

PROFILE

I'm a Computer Applications student with a genuine passion for building things that work — and work well. Over the past few years, I've developed full-stack web applications using React, Node.js, and MongoDB, including a doctor appointment platform and a job-matching app that solve real problems for real users. I care about writing code that's not just functional, but maintainable and thoughtful. I'm hungry to contribute, grow fast, and work alongside people who take their craft seriously.

TECHNICAL SKILLS

React.js	Node.js	MongoDB
JavaScript, TypeScript	SQL	HTML & CSS
Git & GitHub	REST APIs	Express.js

PROJECTS

Medicure — Doctor Appointment System

Academic Project · Node.js, Express, Handlebars, MySQL

A server-rendered web platform bridging patients and doctors, enabling seamless appointment booking and management.

- Built with Node.js and Express backend, using Handlebars for server-side templating
- Implemented doctor search, appointment scheduling, and user authentication
- Used MYSQL for data storage of User profiles(Doctor and Patient) and booking records.

CareerLink — Job Matching Platform

Academic Project · MongoDB, Express, React, Node.js (MERN Stack)

An online job board built on the MERN stack for both recruiters and job seekers.

- Enabled recruiters to post openings and candidates to browse and apply with a single click
- Designed role-based dashboards for both recruiter and candidate user types
- Integrated real-time job filtering and search by skill, location, and category

INTERNSHIP EXPERIENCE

Frontend Developer Intern — Nepsky Technology

Academic Internship

React.js · School Management System

Worked on a real-world school management system, deeply studying the project architecture and contributing to production features.

- Analysed and understood the full project structure and codebase from the ground up
- Built a login modal with form handling, validation, and authentication flow using React
- Developed a course table and attendance table with clean, reusable component design
- Implemented a filter persist feature to retain user-selected filters across page navigation

EDUCATION

Bachelor of Computer Applications (BCA)

2021 – 2026

Nepathya College, Tillotamma, Rupandehi

- Core focus on data structures, algorithms, and software engineering principles
- Hands-on coursework in web development, database management system, and object-oriented programming

INTERESTS & HOBBIES

- Open-source development
- Technical writing
- Traveling
- Reading (tech & fiction)
